

How to Set up PARENTAL CONTROLS

for PRIVACY

Android Phone

The settings on an Android device allow you to set certain rules to help safeguard your child's privacy when they are using it. For example, you can turn off location services to keep their whereabouts private; prevent third-party apps and sites from viewing their information; and stop apps from accessing other functions of the phone (like the camera or microphone, for example). We've produced step-by-step guides on how to tighten up an Android phone's privacy settings.

How to manage location services

- 1 Open the Google Family Link app
- 2 Select your child's account
- 3 On the 'Settings' card, tap 'Manage'
- 4 Tap 'Location'
- 5 On the card with the correct device's name, tap 'Settings'
- 6 Tap 'Location Settings'
- 7 Turn 'Device location' to off
- 8 To reactivate location services in future, repeat these steps and turn 'Device location' back on

How to control access for third-party apps and sites

- 1 Sign in to your Google Families account
- 2 Under 'Members', select your child's name
- 3 Select 'Account info' and then 'More'
- 4 Select 'Third-party apps with account access'
- 5 Turn 'Allow third-party apps to access XX account' to off by toggling the switch

How to manage app permissions

- 1 Open the Google Family Link app
 - 2 Select your child's account
 - 3 On the 'Device' card, tap 'Settings'
 - 4 Tap 'App permissions' then choose a permission
 - 5 Below your child's device, switch the permission off
- Alternatively, you can manage permissions for individual apps. Repeat steps 1 and 2, then...
- 3 On the 'Apps installed' card, tap 'More'
 - 4 On the 'Allowed' list, tap the app you want to change the permissions for
 - 5 Tap 'App permissions'
 - 6 Switch the permission off

How to Set up PARENTAL CONTROLS for APPS Android Phone

On Android phones, restricting access to particular apps usually requires going onto Google Play. From there, it's fairly easy to navigate your way through the settings to manage the parental controls and authentications relating to any apps on the device. The features can prevent your child from downloading or buying anything unsuitable for their age. Updated versions of apps or games that your child has already installed may occasionally contain something inappropriate, so we've explained how to stop those, too.

How to Set up PARENTAL CONTROLS for PRIVACY iPhone

The privacy settings on your child's Apple device give you control over the information stored on it. This allows you to select which apps can access features and information on your child's device: for example, you might wish to block a social networking app from connecting to the camera reel, or specify which apps can use the device's location data.

How to make changes to privacy settings

You can block certain apps from obtaining information from your child's device. You can also prevent your child (or anyone other than you) from altering these settings.

1 Open 'Settings'

2 Tap 'Screen Time'

3 Tap 'Content & Privacy Restrictions'

4 Scroll to 'Privacy'

5 Choose the settings you wish to restrict

6 After you've made any changes, select 'Use Screen Time Passcode' to lock your changes with a PIN

How to prevent changes to other settings/features

You can also stop changes being made to the iPhone's other settings or features by anyone but you. For example, you can prevent your child from altering their passcode, accounts or mobile data settings.

1 Open 'Settings'

2 Tap 'Screen Time'

3 Tap 'Content & Privacy Restrictions'

4 Scroll to 'Allow Changes'

5 Select 'Allow' or 'Don't Allow' on the settings for which you wish to enable or disable changes
